

**PRESS RELEASE**

# ColliCare enters the polish market aiming for a greener transport future.

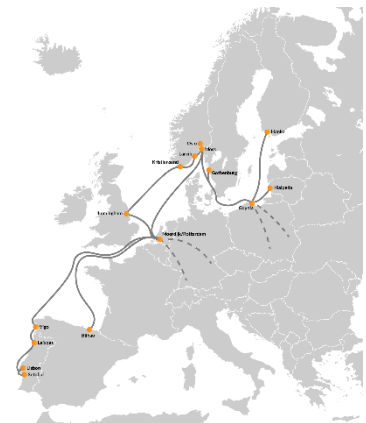

Vestby, January 2022

**ColliCare sets up an office with logistics specialists with local knowledge in Gdynia, with short sea solutions to the Nordics, United Kingdom and door-to-door services throughout Europe. The company has already presented its Polish team and the logistics services they offer.**

ColliCare is an innovative provider that offers all logistics services such as sea freight, rail freight, road transport, domestic and abroad, third-party logistics, air freight, distribution and warehousing. Company focuses on the total flow of goods, from manufacturer to end-user.

The new operator in Poland will offer competitive transport solutions and an alternative for better environmental protection. They will be able to provide sea, rail, road and multimodal transport solutions. For short sea the route is already existing according to the map.

Polish team will also support their clients in customs clearance. It is a very important part of logistics, especially between Poland and Norway, but also to the United Kingdom and other countries outside the European Union.

\*Shown as tonnes CO<sub>2</sub> emissions, as equivalent to climate impact. The picture shows the difference in transporting 1 container.

ColliCare focuses on green logistics solutions. The transport services of this Norwegian company help to reduce the emission of pollutants into the atmosphere. For example, CO<sub>2</sub>e emissions for the transport of 1 container from Poland to Norway may be reduced by as much as 71% if the transport is made by sea instead of a regular truck.

In addition, ColliCare has experience in handling rail services going from China to Poland (terminals in Sławków, Małaszewicze, and Gdynia). This enables cross-docking and further distribution of goods to Scandinavia and Western Europe by sea, road, and rail. All handling by ColliCare Logistics.

Rail and sea logistics services offered in Poland will be complemented by road transport. The combination of these possibilities, so-called multimodal transport, gives excellent connections with Western Europe (Germany, the Netherlands, etc.), with reliability and efficiency.

A new team is in place to take care of their new and existing business partners. Jesper Hansen is the new Managing Director Poland – has extensive experience in international logistics and has been working for several years in ColliCare Norway.

*Jesper Hansen: We have been watching the Polish market for years and we know it very well. The Polish economy is developing dynamically and, in our opinion, it has good prospects. We have been cooperating with clients from Poland for a long time, but mainly from the level of our Norwegian headquarters. Now we are building our team of our local specialists in Gdynia to be even more accessible to Polish customers and offer them modern, environmentally friendly transport solutions to the Nordics and all over the world.*

**About ColliCare Logistics:**

ColliCare Logistics was founded in 2007. It is one of the largest in its industry in Norway and is developing dynamically towards smart logistics and environmentally friendly solutions. The company has 600 employees, with offices in Sweden, Norway, Denmark, Finland, the Netherlands, Latvia, Lithuania, Italy, Turkey, India and China. Now, intelligent logistics services are also available to Polish customers. The company is strongly focused on green logistics services. ColliCare was awarded the EcoVadis gold medal for its actions for sustainable development. Company also takes part in the Green Shipping Program to establish the world's most efficient and environmentally-friendly shipping.
