

# Emission Calculations - our services

- Comprehensive Emissions Reporting and CSRD Compliance
- Strategic Sustainability Support
- EPD Analysis - Environmental Product Declarations (EPD)
- Total Cost of Ownership (TCO) and Route Optimization
- Technical Competence and Customized Solutions

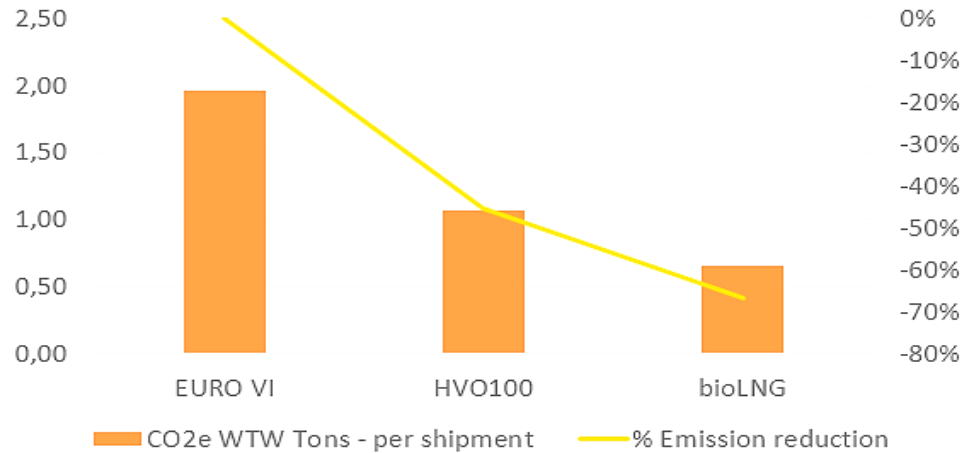

[Read complete info on web](#)

*At ColliCare Logistics Group, we are committed to providing accurate, data-driven Greenhouse Gas (GHG) reporting that enables our customers to meet sustainability requirements, reduce emissions, and optimize logistics costs.*

*Our expertise goes beyond compliance. We deliver insights that help businesses align with corporate sustainability goals, regulatory expectations, and financial efficiency.*

# Example; Comparative emissions analysis

Identification of areas for improvement and suggestions for more sustainable transportation options.

The diagram shows CO2e WTW (Well-to-Wheel) per shipment and the percentage reduction in emissions compared to diesel

Scenario	Fuel type	CO2e-emission (ton) – WTW per shipmentforsendelse	reduction per	Comment
Scenario 1	100% Diesel	1,95	0 %	Emission per shipment when using diesel.
Scenario 2	100% HVO100	1,06	-46 %	Emission per shipment when using bioLNG.
Scenario 3	100% bioLNG	0,65	-67 %	Emission per shipment when using HVO.

The analysis compares CO<sub>2</sub>e emissions from various fuel alternatives in road transport.

# Our environmental Strategy

## Green alternatives

Promote greener alternatives and transfer goods from road to sea, rail and multimodal solutions

## Decarbonisation

Continue to invest in biofuels, gas and electric trucks

## Efficient Logistics

Smart planning and equipment usage. Maximize capacity and minimize resource consumption

# The Responsible Business Conduct Team

## **Sustainability & QA Manager: Sonnie Førrisdahl**

- Responsible for our overall sustainability and quality assurance strategy
- Responsible for human rights and due diligence assessments process
- Responsible for our ISO certifications
- Manager of Security
- Leads the HSEQ team

## **Sustainability Advisor: Rohit Sharma**

- Keeps an eye on new technology
- Responsible for investments in new green technology
- Leads our pilot projects and commitments in environmental programs
- Responsible for GHG emission reporting

## **HSEQ Advisor: Evelyn Solberg**

- Responsible for health and safety measures
- Responsible for labor rights and our Zero Accident Philosophy
- Responsible for ISO 45001
- Responsible for the Integrated Management System
- Member of the HSEQ team

## **Quality Assurance Advisor: René Amundsen**

- Responsible for quality management and quality controls
- Responsible for sub-contractor management
- Responsible for ISO 9001
- Member of the HSEQ team
